

THE TAURANGA RAINWATER HARVESTING SCHEME

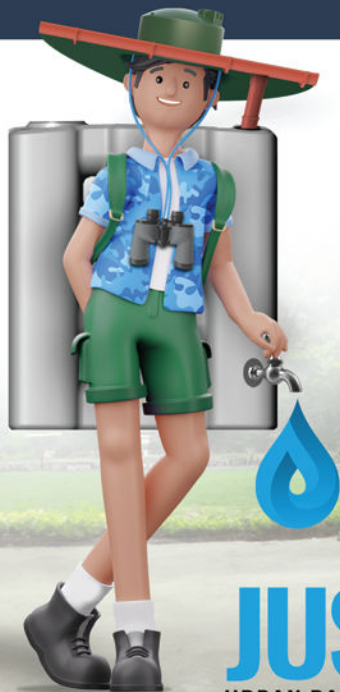

Just Tanks & Devan Plastics have partnered with the Tauranga City Council to promote and deliver savings on a range of rainwater harvesting solutions for Tauranga businesses and homeowners.

This Rainwater Harvesting Incentives Scheme is designed to encourage the use of rainwater for a more sustainable future. By collecting and using rainwater, we can reduce our reliance on mains water, lower costs, reduce our emissions, and help the environment. The scheme supports Tauranga with incentives, making it easier to be a community that leads the way in sustainability.

Save on Water Rates, beat the restrictions, guarantee an emergency supply and do your bit for the environment.

OUR SLIMLINE RAINWATER HARVESTING PACKAGES INCLUDE:

- Your choice of Slimline Water Tank
- A Seismic Restraint Bracket
- Bianco INOX 30 LPM Water Pump
- Pump Cover

WATER TANK OPTIONS

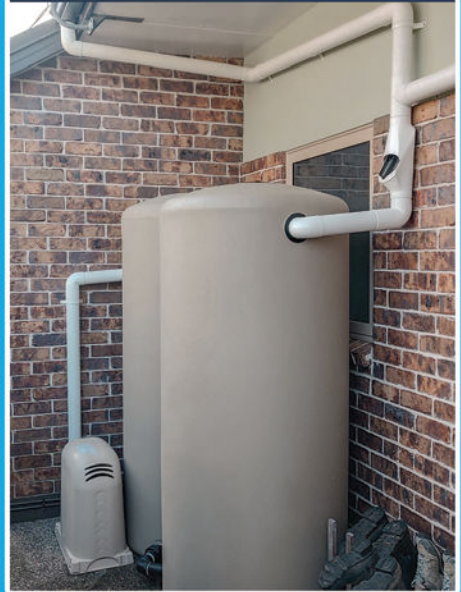

STORMPANEL PACKAGES

1000L Normally \$5,303 **Special \$4,999**
2000L Normally \$6,604 **Special \$5,999**

STORMBANK PACKAGES

1000L Normally \$4,854 **Special \$4,554**
2000L Normally \$5,499 **Special \$4,899**

There are 11 different colours to choose from. If you need work done to prepare the water tank location, like the installation of a concrete base, we can quote and do that work for you also. The pricing outlined above is for a typical hassle-free installation. In some cases we may need more fittings if the distance from the roof to the tank is further than two metres and if you want to go for coloured down pipes.

COST EFFECTIVE INSTALL OPTIONS GRAVITY FED 600L & 1000L PACKAGES

If you are only looking to fill a watering can or run a low pressure hose from your water tank, then we have several cost effective ways for you to do your bit for the environment, save on water rates and have water available for emergency use and to water your gardens and lawns when you need it.

The two options are: 600L & 1000L Slimline

STANDARD PACKAGE INCLUSIONS ARE AS FOLLOWS:

- Your choice of a 600L or 1000L Slimline Water Tank (Ideally, the 600L would need to be mounted on a plinth of some sort, so it is at least 750mm off the ground)
- All downpipes and fittings required to plumb the water tank into the spouting at your house.
- Overflow Kit.
- Plumbing Kit, including flexi pipe, ball valve and fitting.
- Installation by a registered Plumber.
